

ASSESS Knowledge®

Spot the talent timely and cost effectively

Overview

ASSESS Knowledge is a modular based assessment for information, knowledge and best practice of general business disciplines.

ASSESS Knowledge is a critical success factor for any candidate. At Assess, we conduct assessment of job knowledge in various fields ranging from business administration, marketing and human resources to project management, information technology and programming.

Benefits

Reliable Testing

Highly reliable assessment results with emphasis on test security and process integrity.

Time & Cost Saving

Poor performers can be screened out at an early stage in the process, focusing on best candidates.

Local Market Experience

Our tests are calibrated for the local market assessment needs.

Scalability

Our solutions range from on-line single-user testing solutions to large on-site testing facilities and assessment center setup.

Hiring Process Objectivity

Base hiring process on a highly structured and formal process that reduces subjectivity and enhances comparability, thus reinforcing a positive employer brand.

Features

Automatic Scoring

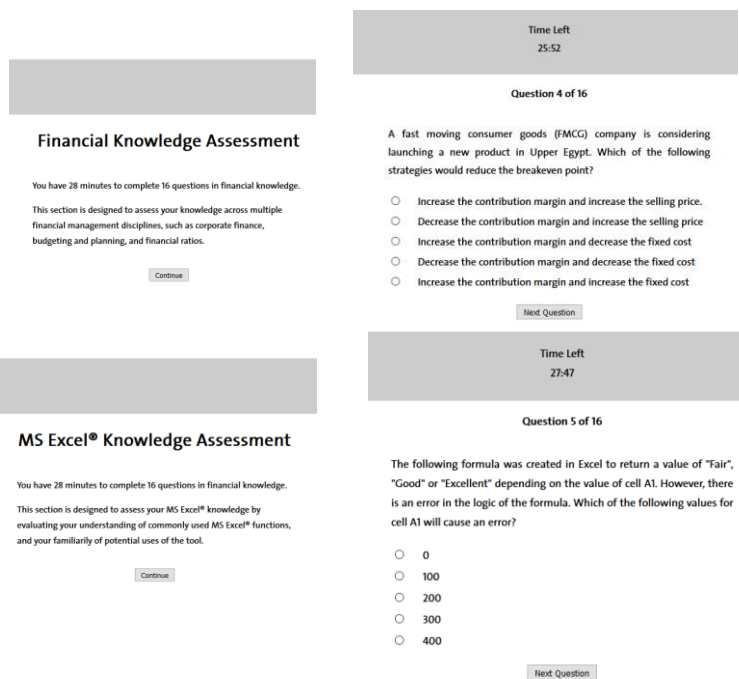

Assessments are scored instantaneously as soon as it is submitted, therefore eliminating manual review and processing.

Computer-based assessments

Instant Reporting

Customizable and modular solutions

Assessments are customizable according to the target level of selection. Each level consists of exercises that match the job requirements and potentially faced challenges. Some exercises can be customized for certain roles based on the insights provided.

The image displays two screenshots of the ASSESS Knowledge assessment interface. The top screenshot shows a question titled "Question 4 of 16" with a time left of 25:52. The question asks about strategies to reduce the breakeven point for a fast-moving consumer goods (FMCG) company. The options are:

- Increase the contribution margin and increase the selling price.
- Decrease the contribution margin and increase the selling price.
- Increase the contribution margin and decrease the fixed cost.
- Decrease the contribution margin and decrease the fixed cost.
- Increase the contribution margin and increase the fixed cost.

 The bottom screenshot shows a question titled "Question 5 of 16" with a time left of 27:47. The question asks which value for cell A1 will cause an error in an Excel formula. The options are:

- 0
- 100
- 200
- 300
- 400

 Both screenshots include a "Next Question" button and a "Continue" button at the bottom.
