

Aptitude Assessment Preparation

1. Take the assessment at a location with good internet connectivity to prevent the assessment session from expiring.
2. Choose a quiet area to take the assessment as you will need to concentrate when it comes to answering the questions.
3. The assessment is limited to a certain amount of time. You may complete it in a shorter time but you will not be allocated extra time if you reach the time limit.
4. Each section is separately timed. If the allocated time per section has passed you will be automatically taken to the next section.
5. Do not spend too much time on one question. If you face difficulty answering a question, take a guess and move on to the next one.
6. You do not lose marks for wrong answers.
7. Make sure you keep track of the timer at the top of the assessment page.
8. You may use a calculator where needed. You may use the PC calculator or your personal calculator.
9. If you face any connection issues, reload/refresh the assessment page and then click on the 'resume' button that pops up.
